To Whom It May Concern,

The Board of Directors of the Antelope Valley Conservancy would like to express their unanimous support for the Tire Abatement Program proposed by the High Desert Keepers. We fully agree with the High Desert Keepers that the discarded and illegally-dumped tires constitute an eyesore and a stress to the fragile and unique desert environment.

Over the past 15 years the Antelope Valley Conservancy has organized and coordinated cleanups of Antelope Valley desert areas, including California State Parks and Los Angeles County Sanctuaries. Without exception, discarded tires have featured among the illegally-dumped waste. A formal and incentivized disposal process that allows Antelope Valley residents to legally dispose of used tires in a way that reduces detrimental impact on the environment is, in our opinion, long overdue.

We strongly believe that the proposed Tire Abatement Program, with its aims to remove existing tire waste and to facilitate the future reduction of these environmental hazards, can therefore only have a positive impact on the quality of life for the human residents, as well as the flora and fauna of the Antelope Valley. We sincerely hope that the High Desert Keepers are afforded the highest levels of support for their worthy endeavor.

By Resolution of the
Board of Directors
ANTELOPE VALLEY CONSERVANCY
